

Welcome to the Passions Project!

Step 1: Proposal

What is the problem you would like to solve? What is it you are passionate about? What is your passion?

Passion Projects include learning to play an instrument, sewing baby hats, sewing headbands for hospital patients, creating a movie trailer, writing a book, prototyping an app, doing 30 days of random acts of kindness, creating a positivity group, podcasting, making a birdhouse...the possibilities are endless.

Step 2: Learning the MakerSpace:

You need to learn basic tools training and MakerSpace culture before being accepted into the Passions Project. All Passions students will serve and act as student role models in the characteristics of..

Humanity

Accountability

Perseverance

And a Love for learning.

Students ready to become a tools Expert are able to Tools Training receive their Expert pin.

Tools training must be complete in order to prove that you are a responsible student and can appropriately run, clean up and help out in the makerspace while using materials and tools correctly.

STEP 3: After that Passions Project facilitators will be in during 4-6th grade lunches and recess. Student are able to come down for lunch/recess to work on their passions.

If you feels like going to lunch/ recess a day to meet your needs and socialise with friends, please do.

Passion Passes will be your students hallway pass to shoat students need. Please come down to the STEAM Lab in the morning to acquire a pass if you do not receive one.

Step 4: Presentations! We would like each students to try and present their passions project! Presentations can be done through presentations, movie, pictures, communication, ect.

Excited to see what your passions are!
